

Application:

0° Return R&G is used primarily as a return or exhaust grille or registers that matches the appearance of the supply outlet. It can be mounted on the wall or the ceiling.

Standard Features:

- Stainless steel (Type 304) construction is highly corrosion resistant.
- Teardrop blades are 3/4" deep, on 2/3" centers.
- Blades can be aligned horizontally or vertically.
- Deflection is fixed at 0° relative to the air stream.
- Mounts in most wall or ceiling styles.
- Minimum panel size is 4" x 4".
- Maximum panel size is 36" x 36". Panels can be joined for larger sizes (p. A311).
- Register RKR B uses RXTA opposed blade damper (p. A437).
- Standard finish is satin polish with one coat of clear lacquer.

Optional Features:

- Tamper-proof screws (p. A342).
- Concealed hangers (p. A343).
- Pull cord and lever damper operator (p. A343).
- Debris screen (p. A343).
- Unit can be set in T-bar panel (Opt. T), and certain sizes can be sheared (Opt. S) to fit T-bar grids (p. A341).

Correction Factors for Grille Performance

Total Pressure (Pt)

- For a 0° deflection grille, use the data unchanged from the table.
- For a 45° deflection grille, multiply the table data by 1.8.

Sound Level (NC)

- For a 0° deflection grille, use the table data unchanged.
- For a 45° deflection grille, add 5db to the table data.

Correction Factors for Register Performance

Total Pressure (Pt)

- For a 0° deflection register with a wide open damper, multiply the table data by 1.2.
- For a 45° deflection register with a wide open damper, multiply the table data by 2.0.

Sound Level (NC)

- For a 0° deflection register with a wide open damper, add 2db to the table data.
- For a 45° deflection register with a wide open damper, add 7db to the table data.
